PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Power BI, Excel, and Machine Learning through internship and end-to-end analytics projects. Skilled in Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Dashboard Development, KPI Reporting, Data Visualization, Forecasting, and Business Intelligence to deliver actionable business insights.

TECHNICAL SKILLS

Programming: Python, SQL

Databases: PostgreSQL, MySQL

Tools: Jupyter Notebook, Streamlit, Git, GitHub, Power Query, DAX

Data Analysis: Pandas, NumPy, Data Cleaning, Data Wrangling, EDA, Statistical Analysis, Data Validation, Feature Engineering

Visualization: Power BI, Tableau, Excel, Plotly, Matplotlib, Seaborn, Dashboard Development, KPI Reporting

Machine Learning: Scikit-learn, Linear Regression, Decision Tree, Random Forest, Gradient Boosting, XGBoost, Prophet, Predictive Analytics, Forecasting, Model Evaluation

WORK HISTORY

Data Analyst Intern — SPK-MAK Technologies, Bhubaneswar, Odisha

Jan 2026 – Mar 2026

- Analyzed 10,000+ retail transaction records across 4 years to identify revenue trends, customer purchasing patterns, and profitability opportunities supporting strategic business decisions.
- Designed an interactive BI dashboard integrating 10+ visualizations, 3 executive KPIs, and 4 business modules to monitor sales, profit, regional growth, and customer segmentation.
- Engineered and evaluated 5 machine learning models using Scikit-learn, achieving an $R^2 \approx 0.60$, improving predictive sales forecasting accuracy via hyperparameter tuning.
- Implemented 36-month (2026–2028) time-series forecasting using Prophet, generating 36 monthly sales predictions and automated business reports for performance evaluation.

PROJECTS

Customer Shopping Behavior Analysis

Python, SQL, Power BI

- Analyzed 3,900 customer transactions generating \$233K+ revenue with an average order value of \$59.76 and an average customer rating of 3.75/5.
- Identified that Clothing contributed \$104K+ (45%) of total revenue, making it the top-performing category, followed by Accessories (\$74K+) and Footwear (\$36K+).
- Discovered that 1,053 customers (27%) had active subscriptions and 1,677 customers (43%) used discounts, providing insights into customer loyalty and promotional effectiveness.
- Built interactive dashboards and SQL reports to track 3,900 customers, 5 payment methods, and purchasing trends, enabling data-driven decisions for customer retention and revenue growth.

Book Store Management System & Sales Analytics

PostgreSQL, SQL

- Designed a database with 3 interconnected tables and 1,500+ records, analyzing 500 orders from 500 customers and 2,697 books sold.
- Generated ₹75,628.66 total revenue with an average order value of ₹151.26 by using SQL queries involving JOINS, GROUP BY, HAVING, and Subqueries.
- Identified key business insights, including the top-selling book (28 units sold) and the highest-spending customer (₹1,398.90 in purchases).
- Performed genre and inventory analysis, revealing Romance as the highest revenue-generating genre (₹13,086.98) and detecting 58 low-stock books to support inventory planning and restocking decisions.

EDUCATION

B.Tech in Computer Science — Sambalpur University Institute of Information Technology, Odisha

2022 – 2026

Higher Secondary (Science) — Swami Vivekananda Memorial Autonomous College, Jagatsinghpur, Odisha

2019 – 2021

CERTIFICATIONS & LANGUAGES

- SQL for Data Analysis – Skill Course
- Data Analysis Bootcamp – Guvi, in partnership with IBM

Languages: Odia (Native), English (Professional), Hindi (Conversational)
